• Goverment centres and military bases throughout the world

Approved Code of Practice
Centra are inspected by Security Systems and Alarm Inspectorate Board (SSAIB) and are also a UKAS ISO 9001:2008 inspected company.

Health and Safety
Centra are accredited by the Contractors Health and Safety Assessment Scheme (CHAS)

Centra is certified to work at height by the International Powered Access Federation (IPAF)

Training
Centra will carry out on-site training or training at our UK facilities, as required.

Security Planning and Consultancy
The business and political environment we live in today requires a security solution with an appropiate level of risk control and capable of providing the assurance needed. Centra will work with you to help design and install a system which offers a high level of security for a sensible budget.

Commercial
Installing security systems to sensitive areas such as Research and Development offices, general office areas, print rooms, IT rooms, communication areas, banking and other locations requiring additional security.

Pharmaceutical and Food Production
By controlling access and installing surveillance cameras to high risk area our systems will provide secure standards which will provide a documented audit trail as required by Inspection bodies.

Correctional
Central can provide "Two Man" verification systems where access to high security areas is required. Protecting public areas with high security locks such as facial recognition and bio-metric systems are also available.

Industrial
Important areas where site safety is of major concern and where sensitive areas need to be kept secure.

Government & Military
Government certified systems designed and field tested to harsh enviroments worldwide.

Critical Infrastructure
Securing nuclear facilities, sea ports, airports and electrical distribution sites.
